

Editing Labels in BowTie Pro™

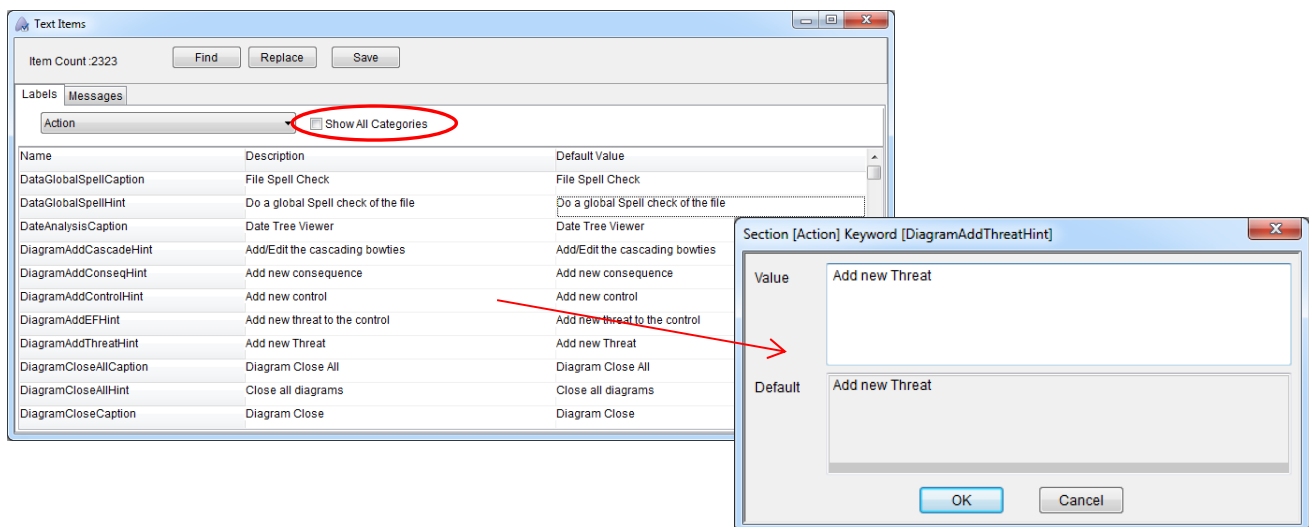

BowTie Pro™ allows the labels to be edited to meet local language requirements or company terminology settings. The language strings are held in XML format files and these can be edited in a separate edit program.

To edit the labels on the screen

- Close BowTie Pro™
- On the start menu go “All Programs -> BowTie Pro -> Tools -> Language Editor”

- Select English from the list of languages
- On the “Labels” section check the box “Show All Categories”

- Press the “Find” button and type in the work that you would like to change on the screen.
- Change the text.
